Sequence 10, Application US/10368046

Publication No. US20040063188A1

GENERAL INFORMATION:

APPLICANT: Robin A. Robinson

APPLICANT: Vittoria Cioce

TITLE OF INVENTION: Method for Isolation and Pur

TITLE OF INVENTION: Expressed Gene Products In

FILE REFERENCE: 44149-3US1

CURRENT APPLICATION NUMBER: US/10/368,046

CURRENT FILING DATE: 2003-02-15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          RESULT 28

   pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     DB DB
